

THE AKC

# TOY SCHNAUZER

*The average size for a Miniature Schnauzer is between 15 to 20 pounds.*

*A Toy Schnauzer, although the term Toy is not recognized by AKC, is between 7.5 to 10 pounds.*

*Originally developed for use a small farm dog, "Ratter", the schnauzer size has allowed the schnauzer to easily adapt to small city quarters.*

*Viewed as charming and attractive companion, the schnauzer is sweet, loving and devoted to his home and family.*

*The Schnauzer is spunky, playful and fearless but not aggressive.*

*He is intelligent and learns quickly and succeeds at Agility.*

*Although he will love the whole family, he often will have a favorite person.*

*The Schnauzer sheds so little that it appears he does not shed at all.*

*Therefore, they tend to cause fewer and less severe allergies in people who are allergic to other breeds of dogs.*
